OVERFLOW & WASTE

32 mm overflow plug & waste not included

RECOMMENDED PLUG & WASTE

SBW006

NOTES

Brackets Included. See next page for overflow description

OVERFLOW DESCRIPTION

Open Drain with Open Tap

Leaving the pop up plug & waste open, the water flow is directed down the drain, preventing the basin from filling.

Closed Drain with Open Tap

Closing the pop up plug & waste, the water flow is directed into the vacuum pipe by the hole in the drain collar positioned over the hydraulic lock. The water flows into the waste through the connected hydraulic lock in the drain that also prevents the water returning to the basin.

Closed Drain with Closed Tap

Closing the pop up plug & waste and the taps waterflow, the water flow stabilised and the basin remains full.
